

HOMEWORK

BELIEF STATEMENT

In a standards-based grading and reporting system, every procedure must be based on promoting success for students, and the level of student success must be a direct reflection of the teaching-learning process (cycle).

DEFINITION

Homework is defined as school assignments/tasks assigned to students, by their teachers, to be completed outside the class. (Wikipedia)

RESPONSIBILITIES

Teachers: Teachers will exclude homework from the course grade. Homework may be recorded as a non-academic indicator in the area of effort. Teachers should always provide specific, timely, and constructive feedback on homework to advance student learning. Homework should be standards based and closely tied to learning objectives. Homework can be intended for practice, preparation, and integration.

School: Risley International Academy of Innovation will clearly communicate the homework philosophy in the student handbook, planner, and on the school website.

Students: Students will recognize that the practice of completing homework will contribute to their learning and will allow them to provide enough evidence of practice with understanding prior to completing an assessment or when requesting re-assessment.
